

MISTER SIZE Bio Lubricant

Discover now - Mister Size's water-based bio lube is a perfect match for the condom, just like the condom is for you.

Highlights:

- Water-based formula
- Extra long lasting lubrication

Why lube?

Because it is fun

The car runs best when it is freshly oiled. It's similar with lube in bed, too! Every movement becomes an exciting, silky experience. Convince yourself of the long-lasting effect of MISTER SIZE bio Lubricant and enjoy endless hours of passion.

Due to the water-based formula, the lubricant is also suitable for sensitive skin and can simply be rinsed off with normal water after use.

MISTER SIZE bio lubricant gel contains only high-quality, bio ingredients for optimal skin compatibility. MISTER SIZE Bio Lubricating Gel is dermatologically tested, fat-free, colorless, odorless and tasteless.

The all-round talent

MISTER SIZE Bio Lubricating Gel can be used with toys as well as condoms and does not cause any permanent stains on textiles. The 100 ml tube has the perfect size for occasional to regular use and convinces visually with its modern package design. Similar to hand creams, the lid can be opened in no time at all via the flip-top closure, should you need a quick refill "in the meantime".

The crystal-clear consistency is easy to spread on the desired areas and provides intensive moisture for the best possible feeling experience.

Application and storage

Simply apply a small amount of MISTER SIZE Bio Lubricating Gel to the desired body part and plunge into the fantastic moist adventure. Repeat as needed.

Keep out of reach of children. We recommend cool and dark storage.
