Highlights:

- Easy to take due to small capsules
- The dietary supplement for every man
- Vegan
- Made in Germany
- 100% quality

For whom is MISTER SIZE Supplement for active men suitable?

For men who are active and want to be even more active. Who need an energy boost every now and then, whether during training, during work or in the bedroom.

What is in it?

L-arginine is an amino acid and especially popular with athletes, as it is said to have a performance-enhancing effect. It is similar with L-citrulline: this amino acid is also popular in sports, as it is said to reduce exhaustion and fatigue. *

Maca, on the other hand, is a Peruvian plant and is traditionally used there as a food and medicinal plant. It is also often called "Peru ginseng" and is considered a natural aphrodisiac there. In addition, maca is considered the "potency miracle of the Incas": the plant is said to have a balancing effect on the hormonal system and to have positive effects on the sexuality of both men and women. **

Zinc contributes to the maintenance of normal testosterone levels in the blood, as well as normal cognitive function.

Taurine is an organic acid and a common ingredient in energy drinks, but is now increasingly present in dietary supplements. Athletes expect taurine, similar to L-arginine, to enhance performance. ***

Application

MISTER SIZE Supplement for active men can be taken 1 capsule per day with sufficient liquid, for example with a sip of water.

We recommend taking the capsule one hour before sexual intercourse or in the morning for a powerful start to the day. Regular intake can enhance the effect.

Do not exceed the recommended amount of daily capsules.

Food supplements are not a substitute for a balanced and varied diet or a healthy lifestyle. A healthy diet and lifestyle can improve and enhance the results.

Our product is not recommended for children and pregnant women. Please keep out of reach of children.

Medical advice

If you are taking blood-thinning, nitrate-containing or prescription potency-enhancing drugs, you should discuss the consumption of MISTER SIZE Supplement for active men with a doctor beforehand. The reason for this is the contained L-arginine.
